

slimline model

We at Transform Health Limited have developed technology and equipment to assist in Rehabilitation and Mobility for those who find it difficult to partake in traditional methods of exercise.

Our approach is to assist in independent living as much as possible, using products that are innovative, effective and affordable.

We are presenting you with our **Transform Health Slimline Model.**

At the core of the technology is a treadmill-based system utilising innovative materials and a patented design, vacuum pump technology, together with advanced IP.

With the integration of an outer garment the user becomes more balanced, supported and stable thus allowing them to move with ease as their gait is automatically improved.

The inclusion of an infrared heat lamp penetrates deep into your tissues and improves blood circulation, hydration and oxygenation in the area. This

supercharged blood flow brings pain relief and healing components while speeding up recovery from any injuries in your tissue or skin.

The use of the machine assists in mobility, muscle strength, and tone will improve, blood circulation increased, lung function improved and the Psychological benefits are evident. The knock-on effect for a business in the health sector is immense; it will reduce the need for prescription medication, increase a persons independence and increase the speed of rehabilitation / recovery.

TECHNOLOGY BENEFITS:

Exercising in negative pressure burns fat faster and aids muscular endurance. There are exercise categories with different levels facilitating users from debilitated, unfit, to ambitious athlete ranging from a slow movement to elite athlete. Suitable for users up to 434lbs.

OUR EXPERIENCE AND RESEARCH

Our research has indicated, that applying under pressure (vacuum)/IR therapy inside of a hermetic Transform Health capsule, sensationally improves blood circulation in the lower parts of the body, where (in the most cases) adipose tissue is being accumulated. Using under pressure/IR improves fat burning during light training on the treadmill. Our research has proved, that during a 30-minute training, with an average speed of 5km/h and 10% incline, calories are burnt up to 4 times faster in comparison with a conventional half hour training on a normal treadmill.

Our research carried out on a group of 200 people also indicated the following:-

- After 4 sessions 183 of the 200 people, observed improvement in the condition of their skin.
- After 10 sessions – 200 people reported a substantial improvement in their metabolism.
- After 20 sessions - 178 people recorded a loss in body circumference - over 12 cm.
- No person indicated any negative effects of exercising in under pressure.

COMPARISON TO OTHER ACTIVITIES - CALORIES BURNT DURING 1 HOUR

Method Of Exercise	Average Calories Burnt	Method Of Exercise	Calories Burnt
Slow walking on a traditional treadmill	140	Transform Health Machine	*1320
Housework	150		
Swimming (400m/h)	300		
Dancing	350		
Fast walking on a treadmill (6km/h)	330		
Tennis	420		
Cycling (30km/h)	500		
Squash	690		

*Results depend on programme used.

FEATURES

- ✓ **Orthopaedic Treadmill**
- ✓ **Integrated Vacuum**
- ✓ **Infra-Red Lamps**
- ✓ **Unique Programmes**
- ✓ **Calorie Count**
- ✓ **Cellulite Reduction**
- ✓ **Weight Loss**
- ✓ **Faster Fat Burning**
- ✓ **User Friendly Screen**

Price on application

Price includes the following:

- Assessment of Installation site
- Delivery and Installation of Machine
- Full day training for unlimited persons at installation site.
- Pack of 5 Skirts (different sizes)
- Full training on using, maintenance and cleaning of machine
- Cleaning products
- 2 services on machine at 6 months and 12 months after installation.
- Warranty for 12 months on Machine parts.

We have also identified a company who is willing to provide finance to facilitate the purchase of machines, subject to meeting their criteria.

Please ask for further information if this is more suitable for you.
