TRANSFORM BODY ROLLER

**PROFESSIONAL DEVICE
FOR MASSAGE AND
SHAPING OF ALL
PARTS OF THE BODY**

Infrared heated distinctively shaped roller with adjustable heat supply provides massage with elements of acupressure and stimulates lymphatic drainage.

The Mechanical pressure of rotating distinctively shaped wooden rolls improves blood and lymph circulation, which helps to speed up metabolism, reduce fat tissue and eliminate waste products. When used regularly TH Roller reduces the volume of body parts, shapes the body, firms the skin and breaks up muscle tightness. It is also an effective method of fat burning and cellulite reduction.

The device is equipped with an LCD colour touch screen monitor which displays the position of exercises. The massage starts at the lower legs (always in and upward direction towards the heart), including outer and inner thighs, hips, buttocks, belly area, back and arms. Infrared heated roller warms up the body and muscles which improves the effectiveness of the treatment. This revolutionary design and ergonomic construction guarantees the highest level of comfort and safety during the session.
